Fluent in Bangla & English

PROJECTS

- **Ticket Master Web Platform:** Spearheaded the development of an all-encompassing ticket booking system enabling users to seamlessly reserve tickets, access emergency services, and order food from the train's menu card via our website.
- **Toxic Gas Detector and Heart Rate Monitor (Hardware Project):** Pioneered a hardware project focused on public safety, featuring a toxic gas detection mechanism and a heart rate monitor, showcasing proficiency in both software and hardware applications.
- **Movie Theatre Management System:** Collaborated on an intuitive Movie Theatre Management System, facilitating effortless ticket booking, schedule viewing, and snack ordering through an integrated food cart.
- **Article Publication Website:** Initiated and developed a user-friendly platform where individuals can submit their writings, with an admin approval system for publication, demonstrating effective content management and collaboration.
- **TechStation:** An E-Commerce Website for Selling Electronic Devices.
